leaders in training

# DIY AI Course

DIY AI can save you time and money by getting your cow inseminated at the right time without the cost or stress of waiting for the technician.

Our DIY AI Courses are delivered over three days and are tailored to give you maximum hands-on tuition. This allows plenty of time for the dexterity required for a successful insemination to be mastered. The course is taught in small numbers on-farm giving a relaxed training atmosphere.

## What the Course Covers

**Getting the semen in the right place right time and in good condition!!**

**Where** – Anatomy and Physiology, Reproductive Management Strategies

**When** – Oestrus Cycle, Fertilisation and Pregnancy

**How** – Insemination Technique, Semen Care, Welfare and Legislation, Nitrogen Safety

## **Course Tutors:**

**John Dawson** MRCVS John Dawson  
MRCVS, BVMS, CertCHP, Dip Cattle  
Footcare

**John Greenwood** Higher National  
Diploma Agriculture, Certificate in  
Education

## **DIY AI Refresher**

This one day course is a great opportunity for those who have already taken the DIY AI course and wish to improve their current skills. It's a great opportunity to revisit any areas you are unsure of under the direction of an AI Trainer.
